

Transforming Businesses with Intelligent, Future-Ready Software Solutions

We are a **next-generation software solutions company** specializing in **automation, AI-powered intelligence, and dynamic digital systems** that streamline business processes, cut operational costs, and unlock new growth opportunities.

Our product portfolio is built with **scalable architecture, AI integration, and dynamic configuration**—ensuring our clients get **future-proof solutions** that evolve with their needs.

1. Process Automation Suite

Our **Process Automation** solutions combine **BPA (Business Process Automation), RPA (Robotic Process Automation), and DMS (Document Management Systems)** to eliminate repetitive tasks, reduce errors, and accelerate workflows.

Business Process Automation (BPA)

- Streamlines and automates complex business workflows.
- Reduces manual intervention while ensuring accuracy and compliance.

Robotic Process Automation (RPA)

- **File Retrieval Anywhere:** Automatically scan local drives, network paths, or mailboxes.
- **Smart Email Parsing:** Identify and extract attachments based on keywords (e.g., invoice number).
- **Automated Metadata Extraction:** Using **AI + OCR**, extract structured data from any document—handwritten, printed, or in any language—and convert it into English.

Document Management System (DMS)

- **AI-Powered Data Capture:** Intelligent OCR processes scanned or digital files and extracts all required metadata.
 - **Dynamic Form Builder:** Auto-create forms tailored to client-specific requirements and populate them automatically.
 - **Workflow Engine:** Manage document verification, approvals, and quality checks via **dynamic, mappable workflows**.
 - **Advanced Search:** Find documents instantly with OCR-powered full-text search.
-

2. Audit & Compliance Automation

- **Generative AI Bot:** Reviews audit and compliance data, identifies risks, and generates recommendations.
 - **Automated Checklists & Task Lists:** Maps audit requirements into action plans.
 - **BPA Integration:** Automates follow-up actions, approvals, and reporting.
-

3. PLM & PPC Solutions (*Product Lifecycle Management & Project Planning & Control*)

Our PLM/PPC software helps organizations plan, execute, and monitor projects with precision.

Modules include:

- **Bill of Materials (BOM)**
 - **Material Planning**
 - **Machine Planning & Routing**
 - **Manpower Planning**
 - **Inventory & Warehouse Management**
 - **AI-Powered Forecasting:** Predict demand, resource requirements, and risks.
 - **Actionable Dashboards:** Each module has its own dashboard plus a central PPC dashboard—powered by **Power BI** with interactive, drill-down charts and graphs.
-

4. AI-Driven Business Tools

- **AI Chatbots & Helpdesk:** Provide instant customer support and knowledge retrieval.
- **AI-Based Insight Generation:** Analyze business data and deliver actionable intelligence.

5. Enterprise-Grade Applications

- **Learning Management System (LMS)**
- **Website Builder & CRM**
- **E-Commerce Platforms**
- **E-Wallet Solutions**
- **Kanban Boards**
- **Email Manager & File Manager**
- **Dynamic Metadata Extraction**
- **Advanced Analytics & Dynamic Data-Driven Reports**
- **Library Management System**

6. HR & Workforce Management

- **HRMS & Payroll**
- **Employee Self-Service Portals**
- **Attendance Capturing** via:
 - Face Recognition
 - Geo-Tagging & Geo-Fencing
 - Biometric Integration
 - Excel Bulk Upload
 - API Integration

Our Core Strengths

- **Dynamic & Reusable Systems:** Form builders, workflow engines, and reporting tools that adapt to changing business needs.
- **AI Integration at Every Level:** From document capture to predictive analytics.
- **End-to-End Automation:** Minimize human effort while maximizing accuracy and speed.
- **Scalable, Secure, and Future-Ready:** Designed for businesses that aim for growth.

Why Choose Us?

Because we don't just build software—we **build intelligent ecosystems** that transform businesses. Whether it's automating repetitive tasks, managing enterprise workflows, or generating deep AI insights, our solutions are designed to **scale, adapt, and deliver measurable value** from day one.
